## Contents

# 1 Knitting Patterns

This class provides a very convenient way to introduce boxed diagrams. We are thus going to use our stock image a few more times. Also, it has few features to make knitting instructions more readable, however, we can adapt them to make prettier documents for our purposes as well.

We have a way of highlighting important text, or as was originally intended, important instructions. Feel free to choose whatever background and border colour you like when you replicate these features, but try to replaicate the dimensions as well as you can

Course	Credits
Introduction to Computer Programming	6
Abstractions and Paradigms in Programming	6
Abstractions and Paradigms in Programming Lab	3
Data Structures and Algorithms	6
Softwares Systems Lab	8

## Note

This is a note. The above feature was introduced to typeset a sequence of knitting instructions. The first column is for the instruction, the second for the number of stitches. But hey, it looks cool!
